

T3 BENEFITS

THE **BENEFITS** THAT COME WITH USING THE T3 MODULAR DISPLAY SYSTEM ARE **ENDLESS...**

OVERVIEW

The T3 modular display system has many benefits. The real success behind T3 is its versatility, and the ability to be reconfigured for multiple events. T3 can be used to create:

-  Small or large exhibition stands
-  Event displays
-  Conference sets
-  Mobile bars
-  Counters
-  Light boxes
-  Photo booths
-  Retail Displays

T3 BENEFITS

Endless display possibilities:

T3 can be used for multiple displays including, but not limited to, exhibition stands, conference sets, retail displays, light boxes, photo booths, event backdrops, entrance features and much more.

Integration of bespoke elements:

T3's flexibility and versatility is equal to any tailor-made, or bespoke display. Slat walling, display shelving, showcases and illumination can all be integrated into the T3 framework.

No tools required:

T3's simple patented, twist and lock connection means that you do not require any tools or lever to push, when installing or dismantling your display.

Compact:

Each T3 profile is only 33mm x 33mm, meaning your display can be packed and stored within a flight case.

Reduced labour costs:

Due to the ease of build, and not requiring tools for build or dismantle, there is no need for skilled labour meaning displays can be built by you or your team.

Custom look and feel:

T3 gives you the ability to completely cover the framework and easily add custom elements. This allows you to create the look and feel of an expensive, traditional custom display.

Reduce shipping costs for ease of transport:

T3 packs down smaller than most systems, meaning some displays can be transported in the back of your car.

Versatile and adaptable to a wide variety of environments:

T3 is adaptable to a wide variety of display environments, allowing the T3 framework to be used within exhibition halls, conference suites, shopping centres, offices and much more.

Re-configurable & Re-usable:

Due to the manageable beam lengths and ease of build, T3 allows you to reconfigure your display for multiple events and arenas.

Lightweight:

The T3 system is produced from aluminium meaning each beam is lightweight and strong.

Can grow as your requirements grow:

T3 allows you start with a simple shell scheme exhibition stand and grow into a large, space only stand as your requirements grow. This is all possible by simply adding a few extra beams and other elements to your original display.

Clad with multiple substrates:

The T3 system has been designed to be clad with multiple substrates, including but not limited to rollable PVC, Foamex, Acrylic and Tension Fabrics.

Speed of build and dismantle:

Requiring no tools, locks or levers to push, means your T3 displays will be quicker to install and dismantle over more traditional methods.

UK manufactured:

T3 has been manufactured in the UK for over ten years.

Cost Savings

The re-usability of the system means that once your display has been used to fulfil one purpose, it can then be used time and time again; either with the same design or reconfigured for a complete different display or use.

Rental options:

T3 makes busy or challenging events possible as extra components can be bought and/or rented to cope with any change in requirements - a definite bonus
